Standards for medicines

- Used in Mted
 - Dictionary of medicines and devices (dm+d)
 - Guidelines for safe on-screen display of medication information
- New/Developing standards
 - FHIR Dose Syntax Implementation Guidance
 - FHIR Resource Medication Statement – Content
- Information about medicines?
 - Started, stopped, changed – reasons
 - Who did what? Follow up?

Medications - NHS England/Digital and PRSB

- The aim of the CCIO 7 – Medications work stream is to
 - provide the definition of a fully computable, interoperable medication message;
 - the business logic to transcribe product based prescribing medication to dose based prescribing
- To understand the gap in the structured care and medication data within existing Care Connect profiles
- Consult widely to consider development requirements and progress alpha pilots
